Chad Koslovsky

Frontend craft. Full-stack ownership.

Milliken, Colorado · chad@koslovsky.xyz

`Senior Frontend/Full Stack Engineer | AgentSync`

01 PROFILE

React and TypeScript product engineer who owns the experience from interface design through APIs, identity and production support. Builds connected client workflows and stays close to the people using them, with practical AI orchestration and a systems background.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | 2015-Present

Own client products from discovery through interfaces, APIs and production support. Build OAuth/OIDC flows and tenant-aware shared services; coordinate specialist contributions.

Product Engineering and IT (Long-Term Contract) · NuPrice | Client engagement within Technomancy IT | 2019-2021

Built and operated a reseller application joining pricing rules, accounts, subscriptions, billing and embedded support. Sustained client ownership began alongside FRII.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Led NOC operations and production escalations, migrated workloads into Docker and Kubernetes, and ran SOC 1/SOC 2 audits. Connected engineering changes with operating responsibility.

Systems / Software Engineer · Office Evolution | 2014-2015

Built SQL/MongoDB applications connecting CRM, provisioning, onboarding and service operations across locations; translated cross-department handoffs into explicit workflows.

Network & Systems Engineer · PlumChoice / Everon | 2012-2014

Engineered SMB networks and endpoints, built diagnostic tools and handled on-call issues directly with clients.

Infrastructure and Systems Focal · IBM | 2010-2012

Supported enterprise infrastructure, automated audit/backup workflows and coordinated cross-team changes.

03 SELECTED WORK

Proofmark | Clear signing workflows · Completed client contribution | Client project

Connected identity, document fields, signing routes, audit history and verification across React/Next.js, APIs and data. Kept security-sensitive state and fallback paths explicit.

Kerf / Warp | Frontend architecture from the compiler up · Independent framework and UI toolkit | In development

Building an agent-oriented TSX framework with its own compiler and Warp UI toolkit. Reusable UI contracts, routing, authentication and data are part of the architecture; the project remains in early development.

NuPrice | Product ownership beyond the interface · Long-term client engagement | 2019-2021

Built and operated a reseller application joining pricing rules, accounts, subscriptions, billing and embedded support. Sustained client ownership began alongside FRII.

04 CAPABILITIES

React, TypeScript and responsive interface design · Node.js, typed APIs and PostgreSQL-backed workflows · OAuth/OIDC, PKCE and tenant-aware access · AI tool orchestration, structured outputs and evaluation · Product discovery, production support and technical ownership
